

Here are the instructional SLO resources available for *all faculty*:

Published student learning outcome statements for your course(s)

The source of this information is the “eSLOs” database.

1. There is an [online search form](#) for courses, instructional programs, and GE sequences. Go to www.dvc.edu, “Offices/departments” quick link (or start in any division or department web pages), “Information and publications” navigation menu fly-out, “Student learning outcomes” link, then the “Search and list” navigation link. The form is self-explanatory.

Search for course and program outcomes

Home > Offices and departments > Information and publications > SLOs >

List student learning outcomes

for , or

for , or

for Or , or

search for courses with in the description,
or type a course number (e.g., ENGL-122)

updated 10/20/2009 1:40:56 PM

2. There are Internet URLs suitable for including in [course syllabi](#) (e.g., www.dvc.edu/slos?ENGL-122), with the label: “Internet URL for this course’s student learning outcomes:” or something to that effect.

Spreadsheet(s) for tracking and reporting assessment results for your course(s)

Regardless of the assessment method you use, there is an Excel spreadsheet for entering or summarizing student-by-student results of SLO assessments for your specific section(s). Each spreadsheet includes totals for forwarding to the department chair. There is a “long” form with the section roster and a “short” form with places to enter totals, only. Go to www.dvc.edu, “Offices/departments” quick link (or start in any division or department web pages), “Information and publications” navigation menu fly-out, “Student learning outcomes” link, then the “Assessment tracking” navigation link, and then one of the “Section assessment form” navigation links — long or short. Copy/paste your section roster from WebAdvisor per the instructions. Complete the form and send the “tear-off” portion to the department chair. E.g.:

47	PLEASE COPY/PASTE THE FOLLOWING LINES LABELED "RESULTS" INTO AN EMAIL MESSAGE TO YOUR DEPT CHAIR					
48	RESULTS	Fall.2009.COMSC.110.3125.slo.assessment.xls				
49	RESULTS	TOTAL	SLO#1	SLO#2	SLO#3	
50	RESULTS	# of Y's	22	22	19	
51	RESULTS	# of X's	0	0	0	
52	RESULTS	# of N's	6	6	9	
53	RESULTS	TO THE:	Please copy/paste these numbers into your copy of our dept's "discipline assessment spreadsheet".			
54	RESULTS	CHAIR:	Download the spreadsheet from www.dvc.edu/org/info/slos/assessment/discipline.htm .			

A PDF with instructions and screen shots

There is a PDF with screen shots that shows departments how to use the assessment tracking spreadsheets that have been developed. It is accessible on www.dvc.edu, “Offices/departments” quick link (or start in any division or department web pages), “Information and publications” navigation menu fly-out, “Student learning outcomes” link, then the “Assessment tracking” navigation link, and then the “Instructions PDF” navigation link.

Assessment tracking

Home > Offices and departments > Information and publications > SLOs > Assessment tracking >

In an effort to promote “easy and useful” ways to assess SLOs, the Office of Instruction is pleased to offer a series of Excel spreadsheets for tracking assessment data.

This tool produces Excel spreadsheets that organize a discipline's course assessment results. By combining information from the **eSLOs** database, the WCS database, and WebAdvisor, the work of building documents to tabulate assessment results is automated.

There are two different “**section assessment forms**” for tabulating section-by-section course SLO assessment results -- the “long form” and the “short form”. Use the long form if you are collecting SLO assessment results student-by-student, outcome-by-outcome. But use the short form if your assessment method already produces class totals, and you do not need student-by-student tabulation.
